DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Pereira.

Pereira discloses the claimed invention, including a watercraft supported by first and second foils, a steering structure having first and second shaft sections (inherent telescopic elements in fork assembly) movably coupled to one another. A fork inherently includes a biasing device such as a spring to force extension of the fork. A handle is sown positioned aft of the fork axis.

Re claim 12, the second pivot fails to define over the steering axis.

The claimed operating characteristics are inherent with Pereira.
